Original Sizzix™ Press

Ellison® manufactures the Sizzix™ System Converter. You will need to use the system converter along with a Spacer Plate and Embossing Mat to cut and emboss Dies.

**CUT**
1. Place the Sizzix™ System Converter into the Sizzix machine.
2. On the Cutting Pad, place paper to be cut, then Die, ridges down.
3. Place the Spacer Plate over the Die.
4. Use a 12x6 piece of cardstock and tri-fold to use as a shim. Place shim on top of Spacer Plate.

**EMBOSS**
2. Leave the Die face up on the Sizzix™ machine.
3. Use a 12x6 piece of cardstock and tri-fold to use as a shim. Place shim on top of Sizzix™ machine.
4. Push through Sizzix™ Machine to emboss the die.

CuttleBug™ by Provocraft®

This machine is capable of cutting and embossing. You will need an Embossing Mat to emboss.

**CUT**
Cutting Sandwich (stack from bottom up)
1. Stack Platform (A) and plate (C)
2. Place die (ridged cutting edge up)
3. Place cardstock/material to be cut
4. Place plate (B) on top
5. Run through the Cuttlebug™ machine.

**EMBOSS**
Embossing Sandwich (stack from bottom up)
1. Remove plate (C) for embossing sandwich
2. Leave die face up on plate (A) with die cut still in the die.
3. Place Embossing Mat on top of the die.
4. Use 2 or 3 pieces of cardstock to shim. *Cautionary Note: Using more than 3 pieces of cardstock will result in plate (B) breakage.
5. Place two acrylic plates (B) on top of sandwich and run through Cuttlebug™ machine to emboss.

Ebosser™ by Craftwell

This machine is capable of cutting & embossing dies. You will need the Universal Adapter Set for eBosser™ to cut & emboss.

**CUT**
